

# Hybrid Electric - HIGH VOLTAGE - Vehicle Technology presents serious safety concerns for First Responders!

## PLEASE HELP TO KEEP YOUR LOCAL FIRST RESPONDERS SAFE!

First Responders could be **seriously injured**, even **killed** by severe burns, electrical shock, unexpected movement of a Hybrid Electric Vehicle or the unintentional deployment of SRS / Stored Gas Inflators / air bags.

It's fact that **less than 5%** of First Responders across the nation have had formal HEV Safety Awareness Training. With over **2 million** Hybrid Electric Vehicles on the road today and **NO GOV FUNDS** ready available to train First Responders, this presents a very serious problem.

### **Hybrid Hazards Company is based in Warwick, Rhode Island.**

We provide HEV Hybrid Electric Vehicle Safety Awareness Training & High Voltage / SRS Shut Down Procedure Guides for First Responders / Fire / Rescue / EMS / Police / NATIONWIDE

***Help us make a difference to avoid unnecessary injuries  
by contributing to educate your local First Responders Now!***
